

Landscape and Development

Built Environment

56% of residents disagreed or strongly disagreed with the building of 'backland development' in the village. 15% strongly agreed or agreed. This is the building on existing gardens as a potential source of housing development

65% of residents disagreed or strongly disagreed that there should be 'infill development' in the village. 18% agreed or strongly agreed that this should be allowed. This included parcels of non-domestic land within and on the edge of the village and can include paddocks and green spaces.
